## PROFESSIONAL SUMMARY

Senior full-stack engineer and engineering leader with 5+ years of experience building SaaS and product-focused web applications using TypeScript, React, Next.js, Node.js, NestJS, GraphQL, MongoDB, SQL, AWS, and CI/CD. Strong in end-to-end ownership across frontend, backend, APIs, data models, and delivery workflows, with a practical, product-minded approach in fast-paced and distributed teams.

## CORE STRENGTHS

- End-to-end feature ownership
- Backend APIs, business logic, and integrations
- SaaS / product engineering
- Cloud deployment, CI/CD, and DevOps workflows
- Cross-functional collaboration
- Frontend architecture and UX-focused delivery
- GraphQL services and data modeling
- AI-enabled platform features
- Code quality, documentation, and team enablement
- Remote-first communication and accountability

## SELECTED TECHNOLOGIES

TypeScript, JavaScript, React, Next.js, Node.js, NestJS, GraphQL, Tailwind, shadcn/ui, MongoDB, SQL, Prisma, AWS, Vercel, CI/CD

## PROFESSIONAL EXPERIENCE

### Software Development Manager / Senior Full-Stack Engineer - SPEEEX

Jan 2022 - Present

- Lead software delivery across SaaS and internal products while remaining hands-on in architecture, backend, frontend, and release workflows.
- Build and evolve platforms using TypeScript, React, Next.js, Node.js, NestJS, GraphQL, MongoDB, SQL, AWS, Vercel, Tailwind, and CI/CD pipelines.
- Owned end-to-end delivery of a headless CMS that unified content management across multiple platforms and improved maintainability for product teams.
- Spearheaded development of Asendio LXP, an AI-enabled learning platform focused on personalized learning paths, analytics, and workflow automation.
- Built a custom HR SaaS platform covering employee management, payroll workflows, leave handling, and operational analytics.
- Established coding standards, documentation practices, review expectations, and DevOps workflows to improve stability and developer efficiency.
- Partner closely with business and product stakeholders to translate requirements into scalable technical solutions and execution plans.

### Full-Stack Developer - Betotrace BV

Feb 2023 - Nov 2023

- Developed a SaaS platform for the construction industry focused on logistics, ordering workflows, and team communication.
- Contributed hands-on across frontend architecture, feature delivery, authentication, access control, dashboards, and analytics capabilities.
- Improved usability and performance through modern JavaScript-based frontend patterns and more maintainable application structure.
- Worked with international and cross-functional teams in a distributed setup to align engineering delivery with product goals and market needs.

### Software Developer - Freelance

Apr 2021 - Jan 2022

- Delivered custom web applications for international clients with a focus on business operations, automation, and user experience.
- Built tailored solutions including business automation tools and domain-specific systems such as patient management applications.
- Managed scope discussions, technical implementation, and ongoing improvements while maintaining long-term client relationships.

### Frontend Developer - Outkos

Aug 2020 - Apr 2021

- Modernized the company web presence with responsive frontend implementation and improved UX quality.
- Developed EduSpark, an interactive educational platform for children.
- Collaborated closely with designers and senior developers, strengthening frontend best practices, teamwork, and delivery discipline.

## EDUCATION

Computer Engineering - University of Prishtina
